

KOHINOOR (JP) THEODOLITE

Theodolite is sturdy in design and of the finest Coated optics. Theodolite is built in within a directional magnetic compass for easy surveying. The vernier scales are made of German Silver, high polished accurately divided

SPECIFICATIONS

Telescope (Internal Focusing)

Equivalent Focal Length	150
Magnification	30 X
Effective Aperture of objective	40 mm
Field of View	1°30"
Shortest Focusing Distance	1.6 mtr
Longest Focusing Distance	200/300 mtr
Stadia Multiplying Constant	1:100
Stadia Additive Constant	0
Image	Erect

Horizontal Vertical Circle

Diameter of Horizontal Circle	115 mm
Diameter of Vertical Circle	94 mm

Level Vials

Sensitivity of Plate Level	30"/2 mm
Sensitivity of Alidade Level	30"/2 mm

Optical Plummet

Magnification	2.5X
Focusing Range	0.5m- ∞
Field of View	7°
Weight	5.750 kg
