TRANSIST THEODOLITE

The "Vernier Transit Theodolites" are well designed and manufactured high quality standards. They are suitable for measuring Horizontal, Vertical angles & Tachometry. Applications in general and building site surveys.

SPECIFICATIONS

Telescope Image	Erect
Magnification	26 X
Length of Telescope	175mm
Shortest Focusing Distance	1.5mtr
Longest Focusing Distance	200/300 mtr
Objective Aperture	40 mm
Stadia Line Ratio	1:100
Addition Constant	200/mtr
Plate Bubble Sensitivity	20"/2 mm
Vertical Circle Sensitivity	20"/2 mm
<u>Optical plummet</u>	
Magnification	2.5 X
Focusing Range	0.5 m - ∞
Weight (W/o Box)	5.5 kg

VERTICAL CIRCLE & HORIZONTAL CIRCLE

a) Graduation of Circle	360
b) Reading by Vernier	20"
	10"
